BIOGRAPHY

The journey of EXIT began when Beni Sax and the Haller brothers founded the band after they finished high school in the summer of '95. Andy Bieri joined the Band in 2002 after the first drummer left the band. Since then, the guys developed their skills constantly and the sound became intense, powerful and aggressive.

Inspired not only by old school death metal bands, but by thrash metal, hardcore or grind core as well, the band produced five longplayers and became an important act in the Swiss metal scene.

Due to their unbroken motivation to play shows, EXIT has made a name for itself as a powerful and compelling live-band. In fall 2016 EXIT released the latest Album "Into Darkness" through Art Gates Records, followed by many shows in Switzerland, France, Poland, Latvia, Lithuania, Estonia and Russia. Throughout the last years, the band had the chance to play with bands like Sodus, Massacre, One Man Army, Dr. Living Dead, Evil Invaders and many others.

„Exit keep Face The Enemy firmly rooted in the melodic death side of things, never quite giving way to anything that could definitely be called “groove metal,” but it is the superb balance of these elements and all those others that the band employ that makes Face The Enemy such a refreshing and rewarding experience; one that really should see Exit competing on the world stage.“ – 8/10 pts. – [The Metal Observer](http://TheMetalObserver)

„In this album “Into Darkness ” this band delivers a strong album where their skills as technical musicians are shining through in high scale totally. You really hear they are very experienced skilled musicians with a long experience in their pockets. Their technical skills are just outstanding(...)An excellent work I sure would recommend to every dedicated metal fan out there to buy to their metal collection.-
